

Wiremold® Productivity Enhancing Solutions

Evolution™ Series Poke-Thru Devices

- 6" & 8" configurations provide twice the capacity of standard models.
- Devices are recessed below floor level for maximum protection.
- No need for fasteners or a second installer with simple "step-on-it" installation.
- Pre-pour sleeves eliminate the cost of core drilling after concrete is cured.

Ratchet-Pro™ Round PVC Floor Boxes

- 44% to 57% faster to install on dual-service applications than competition.
- Removable divider for dual service.
- Unique ratcheting system for easy post-pour leveling.
- Interior cubic inch markings that eliminate guesswork and calculations.

Prewired Raceway

- Get off the job in 1/3 the time.
- Working with your specs, we handle all the wiring and pre-assembly work.
- Just mount raceway on wall, connect feed wires & snap-on pre-cut covers.
- Take less time to get the job done right, and be more productive.

Modulink™ Nonmetallic Rectangular Floor Box

- Single box can be used to create one-, two-, or three-gang applications.
- Allows cover flange connection without glue or mechanical fasteners.
- One-piece design is easy to install and completely water tight.

FlameStopper™ Thru-Wall Fitting

- Protect the integrity of a firewall without the use of caulk or putty.
- Add or remove cables easily.
- For both new and retrofit installations.

4000 Designer Series™ Raceway

- Modular no-saw cut base, integrated divider, and Adjust-to-Fit™ couplings reduce cutting.
- Obstacle avoidance fittings to bypass large and small obstacles.
- Available prewired.
